
Subject Index

A

Adequacy 10
aortic pressure 24
Arterial stiffness 24

B

body surface area 15

C

CAPD 38
catheter loss 50
Catheter placement 61
cats 50
complications 61, 64

D

diabetes 38
Drop-out 19, 64

E

endstage renal disease 10, 32
Exit site 53

I

immediate dialysis initiation 58
incremental dialysis 10
infections 38
intraabdominal adhesions 50
intrauterine devices 47

K

Kt/V urea 15

L

leaks 64

M

Mobil-O-Graph 24

N

negative pressure 53
Neisseria mucosa 47
Neutral dialysate 5

P

Pasteurella 50
Percutaneous catheter placement 58
peritoneal damage 5
peritoneal equilibration test 5
peritoneal function 42
peritonitis 38, 47, 50
prescription 10
prevention 64
proactive combination therapy 42

R

remote monitoring 32
Residual renal function 42
Resting energy expenditure 15

S

safety 58
survival 38

T

technique failure 19
Telehealth 32
Telemedicine 32
total body water 15
total energy expenditure 15

U

urinary bladder 61

V

validation studies 24

W

wound therapy 53
